## SHIPPING INFORMATION

**THANK YOU FOR YOUR ORDER. It has been filled and carefully checked.**

Care has been taken to fill your order according to your instructions. Occasionally orders which we receive have errors on them. For instance, the description will call for a body tube and give a catalog number for a nose cone. In such cases we will do our best to send the items we think you wanted.

**Please do not destroy these papers until you are satisfied that your order is all right in every respect. If you write us about this order, please be sure to return ALL of these papers with your letter.**

If you return any part of this order please glue the envelope containing these papers and your letter to the outside of the package and apply additional postage for the envelope.

**If you do not at first find all of your merchandise remember that small parts may be easily lost among the packing materials or may be packed inside other parts. Check very carefully before writing us about shortages.**

It is sometimes necessary to mail your order in more than one carton. If you do not receive your total order complete in one box in one mail delivery, do not be surprised. Many times packages become separated in the mail and may arrive as much as ten days apart.
